1.Introduction

YouDex family, we adopt a decentralized platform that enables our investors to transact with security.

Decentralized exchange, Dex, on the other hand, means that peer-to-peer transaction without being interfered with by third parties or authorities.

As technology improves, the standards for our life changed dramatically. Its effects can be observed on most casual things, for example; money. Hereupon, money has turned into cryptocurrency and plays a significant role in our lives as cryptocurrency. Cryptocurrency can be defined as an exchange that uses cryptographical functions to carry out financial transactions. There are two kinds of these exchanges: Centralized vs Decentralized. Now, we will explain both of them so that you can choose and decide which one suits you the best. Firstly, a centralized cryptocurrency exchange is a platform where the buyer or the seller can transact digital money. However, third parties have to monitor the transaction and secure the money to protect it, which means that all transactions are managed by a central authority. You can easily find popular centralized exchanges online like Binance, Coinbase, Kraken, etc. The popularity of these exchanges stems from infrastructure and liquidity. Apart from these, the centralized exchanges entered the market first and created a market for itself. Decentralized exchange, Dex, on the other hand, means that peer-to-peer transaction without being interfered with by third parties or authorities. Contrary to a centralized exchange, in decentralized exchange, no one has control over you and your transactions which makes it more and more popular among users. Besides that, decentralized exchanges offer more protection from hackers to their users. Centralized exchanges are more open to attack because third parties use private keys to access all funds and assets of users, in case of being hacked all can be lost. That is to say, in terms of security decentralized platforms are more secure and as an investor, you can depend on these platforms. Another important feature of Dex is no fees are needed contrary to the centralized platforms which force you to pay. As YouDex family, we adopt a decentralized platform that enables our investors to transact with security.

2. YouDex Vision

The swindler teams among Blockchain exploit the investors for their own interests through such projects. Moreover, while doing this, many social media influencers also contribute to this exploitation which makes it harder for the investors to choose the correct investment.

Thousands of exchanges around the world have been established with the mission of serving their investors. However, many exchanges did not give the investors the real value they really deserve thinking merely about their own profit and gain from the investors. In fact, they did not refrain from filling their pockets by manipulating and misleading them instead of getting the investors to make gain. Consequently, many investors who believe in blockchain technology and its bright future have actually lost their trust in technology and the system itself.

As to stop the rot, we are launching the world's first community-supported decentralized (DEX) exchange. Here comes YouDex! In this way, we want to manage our exchange more democratically with the decisions to be made by submitting all the changes, management, listing, delisting, ICO, Airdrop, and many other decisions to be made within our exchange. It is obvious that just as a stock market that does not value its investors loses reputation, an exchange that values its investors will become very valuable over time. We believe in this inference and build our exchange on customer-driven.

Most of today's blockchain technologies are not released by project teams to develop a real product, unfortunately, they sell their investors the Brooklyn bridge. The swindler teams among Blockchain exploit the investors for their own interests through such projects. Moreover, while doing this, many social media influencers also contribute to this exploitation which makes it harder for the investors to choose the correct investment. This modern technology exploitation system, unfortunately, prevents the use of blockchain technology in the desired mission. All of these slowed down the progress of the sector and even caused it to decline considerably. It is time to put an end to the rot.

As YouDex family, we are determined to prevent the abuse of the sector with 12 main team members, each of whom is experts in their fields, with their own teams of these team members more than 100 employees in total.

As YouDex family, we are determined to prevent the abuse of the sector with 12 main team members, each of whom is experts in their fields, with their own teams of these team members more than 100 employees in total. We have built the entire ecosystem as investor-centered to offer you the best projects and to work with all our strength to help you choose the best. We have no hesitation to continue our understanding of projects that always value the community; nor will it be. We are determined to see each of our investors as our own business partners, from the beginning to the end of the project. You can easily convey your requests, complaints, and suggestions to us through our many communication channels. Let's get this ecosystem where it should be together. Thank you in advance for trusting us and for being with us.

3. YouDex Promotions

The Basic Setup of our Exchange is designed as DEX (decentralized) in order to be global. In this way, we can easily grow and reach any target market without being stuck to many State procedures from all over the world. In doing so, we can be one of the safest platforms in the world with our highly secure technological infrastructure. Today, many blockchain projects, unfortunately, cannot find themselves on Global exchanges due to high listing fees and manipulation concerns. By changing this mission, we are offering the privilege of listing with the world's first investor vote on this stock exchange. While doing this, we transparently announce the projects that apply to us. Moreover, in order to help our investors make easier decisions, we investigate those projects for you. When our pre-review is completed, we give each project an evaluation score of 10 points and share the project

Besides, we provide our investors to give airdrops to the ones holding U2 as a listing fee for all the coins listed with us. Thus, we contribute to the gain of everyone who trusts in our ecosystem. We put the projects that want to start ICO on our stock exchange to your vote, and we provide priority ICO participation to everyone who holds U2.

description with you. From now on, if our community wishes, we also allow them to ask those project teams everything the community is curious about the project through AMA (Ask Me Anything) events, so when the community votes on the project, we hope that they can choose the right project.

Besides, we provide our investors to give airdrops to the ones holding U2 as a listing fee for all the coins listed with us. Thus, we contribute to the gain of everyone who trusts in our ecosystem. We put the projects that want to start ICO on our stock exchange to your vote, and we provide priority ICO participation to everyone who holds U2.

We consult with you on many decisions we will take regarding our Stock Exchange and as investors, we want to make you a partner in our decisions. While doing all this, we decided to pay 25% of the stock exchange transaction fees to our valued U2 investors every month as U2, so we convinced ourselves that we think the decisions you will make for our stock exchange are labor and that we can pay for it in this way. Moreover, we hope that our ecosystem will be sustainable by ensuring that our investors receive regular income thanks to our STAKING awards, which we plan to pay regularly to U2 owners.

While designing the token distribution of our Exchange, we discussed in a detailed way many elaborations such as system costs, administrative expenses, insurance funds, reserve emergency reserve, and thus the ecosystem became a more convenient and investor-protected program. While establishing an exchange, we examined many projects to determine all kinds of requests and demands of the users correctly and we decided to offer you the stop-loss feature, swap feature, leverage feature, leasing feature, offline staking feature, lock feature, and borrowing features.

Remember that we care about your ideas about implementing new technologies related to our stock exchange in the future because we are a big family.

4.Token Distribution Chart

Total Number of U2 Tokens: 300.000.000 (Three Hundred Million Units.)

Graduated First Sale: 2% (6.000.000) (All Open) (2.000.000 pieces from 0.04 Cent - 2.000.000 from 06 Cent - 2.000.000 from 0.08 Cent will be sold via YouDex to the investors who want to enter first.)

- First Stage Sales Amount: 5% (15.000.000) (All Open) (First Sale 0.10 Cent)
- Pre-Sale (ICO) Amount: 20% (60,000,000) (All Open) (First Sale 0.13 Cent)

- Crew and Backup Reserve: 20% (60,000,000) - (10% Open- Rest will be opened in 3 years)
- Staking Rewards: 21% (63,000,000) - (All Closed- will be released 3 years)

300.000.000
Total Number of
U2 Tokens

Besides, we provide our investors to give airdrops to the ones holding U2 as a listing fee for all the coins listed with us. Thus, we contribute to the gain of everyone who trusts in our ecosystem. We put the projects that want to start ICO on our stock exchange to your vote, and we provide priority ICO participation to everyone who holds U2.

5.Circulation Plan

- Total Circulation Amount That Will Be Open In The Beginning: (105.000.000 Pieces)
- Amount To Be Opened Each Month During The First 15 Months: (5.500.000 Pieces)
- Amount to be Opened Monthly between the 16th and the 18th Month: (3.500.000 Pieces)
- Amount to be Opened Monthly in 19th and 30th Months: (2.500.000 Pieces)
- Amount to be Opened Monthly in 31st Months and 36th Months: (1.500.000 Pieces)
- Note/Caution: Staking Reward Distribution Is Not Included In This Account.

Up To 36th Month, Staking Awards Will Be Distributed To The Award Winners Every Month (1.750.000 Pieces). However, this period may start when the staking infrastructure is ready from the date announced.

300.000.000
Total Number of
U2 Tokens

Besides, we provide our investors to give airdrops to the ones holding U2 as a listing fee for all the coins listed with us. Thus, we contribute to the gain of everyone who trusts in our ecosystem. We put the projects that want to start ICO on our stock exchange to your vote, and we provide priority ICO participation to everyone who holds U2.

This amount consisting of 500,000 tokens, its intended use to promote our users and endear them to our project on our social media channels Twitter, Telegram, etc.

6.U2 Opening Times and The Details to Purpose of Use

TOTAL AIRDROP AMOUNT

This amount consisting of 500,000 tokens, its intended use to promote our users and endear them to our project on our social media channels Twitter, Telegram, etc., which will be opened in the first place. Our users who want to earn Airdrop Tokens can follow us on social media and do the requirements to get the airdrops.

However, to prevent being aggrieved by our buyers who make the first purchase in pre-sale and ICO sales, the airdrops of our members who are entitled to receive them will be unlocked 2 months after the ICO sale and transaction approval will be given for trading given for the purchase. The awards of our members who are entitled to receive airdrops will be unlocked and approved for sell-buy, 2 months after the ICO sale.

U2 Opening Times and The Details to Purpose of Use

In the Pre-sale Program, a sale will be made 30% below the normal ICO sale price.

PRIVATE SALE PRE-ICO STAGE

Since this amount is a first-tier sale after the token is issued, it will be offered for sale at 3 levels on our website for a period of 72 hours. Minimum 10,000 and maximum 50,000 units can be sold to 1 ETH address. The first customers who register at the first sales level are entitled to the registration according to the registration application order. If there is more ETH, their ETH will be refunded and it is recommended to buy them from the next level. If it ends earlier than 72 hours, it will be announced quickly and the next stage can be started 72 hours.

FIRST STAGE SALES AMOUNT

This is a total of 15,000,000 items, which corresponds to 5% of the total quantity. The relevant amount that carried out after the promotions and AMA activities with communities on Social Media, and the amounts in the hands of the buyers are for purchase and sale together with the stock market listings after the ICO sale will be opened for processing. In the Pre-sale Program, a sale will be made 30% below the normal ICO sale price. (Our envisaged First Stage Sales Price is 0.10 cents)

U2 Opening Times and The Details to Purpose of Use

It consists of a total of 18,000,000 pieces, which corresponds to 6% of the total number, and this amount will be completed in 18 months, by opening 1,000,000 pieces every month.

TRADE COMPETITIONS AND AWARD PROGRAMS

It consists of a total of 18,000,000 pieces, which corresponds to 6% of the total number, and this amount will be completed in 18 months, by opening 1,000,000 pieces every month. These tokens will be used to increase the volume values of our exchange, to support newly entering ICOs, and to increase our community's belief in the ecosystem day by day.

ICO SALES AMOUNT

This amount will be made up of 60.000.000 pieces, corresponding to 20% of the total number, and the relevant amount will be announced to a wide target audience with the post-sales marketing. Immediately after the ICO sale, both pre-sold tokens and ICO tokens will be gradually traded on various exchanges. (Our envisaged ICO Sale Price is 0.13 cents.)

U2 Opening Times and The Details to Purpose of Use

These tokens will be used for expenses such as software development, content creation, and the integration of modern technologies into our exchange.

PROMOTION AND MARKETING EXPENSES

This consists of a total of 15,000,000 items, which corresponds to 5% of the total number. This amount will be completed in 15 months by opening 1,000,000 pieces each month. These tokens will be used within the marketing and social media expenses of our exchange and our community managers, as well as any visual artwork, video presentation, etc. that contribute to the promotional activities of our community. Also, the awards of our competitions will also be provided from this budget.

PROJECT DEVELOPMENT EXPENSES

This consists of a total of 15,000,000 units, which corresponds to 5% of the total number. Each month 1,000,000 pieces will be opened and the total amount will be completed in 15 months. These tokens will be used for expenses such as software development, content creation, and the integration of modern technologies into our exchange.

U2 Opening Times and The Details to Purpose of Use

This fund consists of a total of 30,000,000 items, corresponding to 10% of the total number. These tokens are planned to be completed in 30 months, by opening 1,000,000 pieces each month.

RISK BALANCING BUDGET

This consists of a total of 18,000,000 pieces corresponding to 6% of the number. All of this amount is open and the amount of 500,000 airdrops to be given in the first place will be covered from this budget. The reason why this amount is open and reserved specifically for the team to maintain price stability against market manipulators. Against market manipulators risk, this amount is open and reserved specifically for the team to maintain price stability.

INVESTOR INSURANCE FUND

This fund consists of a total of 30,000,000 items, corresponding to 10% of the total number. These tokens are planned to be completed in 30 months, by opening 1,000,000 pieces each month. Even though we are working with high-security infrastructure, these tokens are a trust fund that we will provide to our investors against a possible hack, and also a fund where we will protect all our investors who trade with us with a digital insurance program.

U2 Opening Times and The Details to Purpose of Use

Also, the tokens accumulated in this pool will serve as a reserve and can be used in case of an extraordinary situation.

TEAM POOL AND SPARE RESERVES

It consists of 60.000.000 pieces, corresponding to 20% of the total number. 10% of these tokens will be open at the first stage, and the remaining 90% will be completed in 36 months by opening 1,500,000 pieces each month. Since these token holders are the main team of the exchange, they will stay more connected to the ecosystem in this way. Besides, if one or more of the team members want to withdraw from the project, the tokens of the new months, which will belong to him as of the month of withdrawal, will be distributed as airdrops to the stakeholders by logarithmic calculations. Also, the tokens accumulated in this pool will serve as a reserve and can be used in case of an extraordinary situation.

STAKING AWARDS

This consists of 63.000.000 pieces, corresponding to 21% of the total number. All of these tokens will be distributed to our stakeholder investors monthly for a period of 36 months 1,750,000 pieces. The exact date will be announced when our system infrastructure will be available and the distribution period will be started.

7. Investor Categories

In this section, we will introduce you to the investor rights we have planned for our investors, the income models we provide to investors and the silver, gold, and platinum memberships for our investors who show loyalty to our system and detail the privileges that our investors will have.

**SILVER
MEDAL
INVESTOR**

**GOLD
MEDAL
INVESTOR**

**PLATINUM
MEDAL
INVESTOR**

Investor Categories

At this stage, we will give detailed information about the rights provided for particular categories that have different privileges for our investors.

SILVER MEDAL INVESTOR

To become a Silver Medal investor, an investor must have between 2,500 and 7500 U2 tokens. These investors can benefit from monthly staking income and some ICO's. They also have the right to earn income from exchange transaction commission income, which will be paid every month.

GOLD MEDAL INVESTOR

So as to become a Gold Medal investor, an investor must own between 10,000 and 15,000 U2 tokens. These investors can benefit from the monthly staking income, listing Airdrops to be given, the monthly transaction commission income payments, and the right to purchase from many ICOs. They also have the right to vote in the polls and agendas opened.

PLATINUM MEDAL INVESTOR

In order to become a Platinum Medal investor, an investor must own 25,000 or more U2 tokens. These investors will receive a share from monthly staking income, listing Airdrops to be given, transaction commission income to be given each month, and they will also gain priority purchase right from all ICOs to be made. In addition to all these, they also have the right to organize polls, form agendas, and vote for them.

Investor Categories

At this stage, we will give detailed information about the rights provided for particular categories that have different privileges for our investors.

8. Investor's Rights

INSURANCE FUND

Our Stock Exchange stands out from other competitors with the value that it attaches to investors. Because while other stock exchanges see their investors as customers, we are happy to see them as our business partners, and we contribute to making each of our investors feel safe with the privileges we provide to them.

Thanks to the insurance fund that we consider especially for our investors, we guarantee our investors to cover all their losses arising from a possible security problem. Also, with the digital insurance platform that we will make, we keep the transactions of each of our investors with high confidentiality and in case of a possible malfunction, we ensure that they receive the documents of their past transactions and by easily comparing their transactions with our system, we protect them from being victimized. These transaction history records are backed up on your Interface in the system every time you make a transaction, and only you can access them.

As to access your history records, you can log in with a security image and a password, also alternatively, you can access it directly with a private key. Thus, you can get an extra secure transaction history statement without giving any KYC. Our insurance fund is never used for sale and is stored only for the needs of potential victims and, if required, transparently announced to the community. This fund will always be there, rest assured.

Investor's Rights

The right to vote is the most important privilege that distinguishes us from other stock exchanges and enables us to interact with our investors in real terms.

RIGHT TO REGULATE A SURVEY

Another indicator of the value we give to our investors is the right of our platinum members to conduct surveys. This is a platform where our investors can submit their decisions to the team by opening surveys on any subject they want regarding our exchange. Thus, we believe that we will manage our stock exchange more transparently. Besides, we open the way for our platinum member investors to use their right to create an agenda if they wish, and to open this to the support vote of other investors and to convey their possible new agendas to our team. Hoping that all these rights will open a strong and direct communication channel between the team and the investors, we give you a real voice in the management of our exchange.

RIGHT TO REGULATE A SURVEY

The right to regulate a survey is a right that we define to our gold members and above. It is a concept where they can express their views and comments on all the surveys and agendas, and thus we hope to have received the opinions of many investors on the agenda.

The right to vote is the most important privilege that distinguishes us from other stock exchanges and enables us to interact with our investors in real terms. Because today, many stock markets, unfortunately, make quick decisions for their interests and do not care about their investors in real terms, so investors are suffered. While we are building the biggest stock market of the future, we can never ignore our investors because we are a big family.

9. Revenue Models Provided to Investors

Our Stock Exchange stands out from other competitors with the value that it attaches to investors. Because while other stock exchanges see their investors as customers, we are happy to see them as our business partners, and we contribute to making each of our investors feel safe with the privileges we provide to them.

While we are setting up our stock exchange, we think of our investors the most because the permanent and sustainable ecosystem depends on keeping the investor satisfied. The closer the ties are established with the investor, the more robust and permanent the ecosystem will be. For this reason, we have not neglected to provide several income models to our investors, we have worked with all our strength to offer you an ever-winning investor model at the highest level with these income models that we have designed and we will continue to work in the future.

**STAKING
INCOME**

**THE RIGHT OF 25%
OF THE EXCHANGE
PROFIT TO BE PAID
TO INVESTORS
EVERY MONTH**

**AIRDROP
REVENUES OR
LISTING INCOME**

**ICO
PRIORITY
SALES
INCOME**

Revenue Models Provided to Investors

We are committed to paying every 25% of our stock exchange transaction commission income to our investors as U2, and every commission earned on our stock exchange is announced weekly, by doing so we promise to give the real value you deserve.

STAKING INCOME

THE RIGHT OF 25% OF THE EXCHANGE PROFIT TO BE PAID TO INVESTORS EVERY MONTH

With our staking income model, we plan to provide regular income to every investor holding U2 tokens monthly in good order with an algorithm model that we will determine later on. Thus, we are proud to continuously support our valuable investors as a loyalty award. We want to present our staking revenue model to you with the questionnaire as options, so we believe that the community will make the model that is most ideal for itself.

Today, many exchanges think that by issuing tokens, they get their investors to earn with these tokens, and therefore they prefer not to go beyond seeing them as users without transparently informing the many income and cooperation that are in the background of the stock market to their investors. However, this preference is quite false because the stock market which has grown so much thanks to their investors, should not ignore them after obtaining its goal. Therefore, we are committed to paying every 25% of our stock exchange transaction commission income to our investors as U2, and every commission earned on our stock exchange is announced weekly, by doing so we promise to give the real value you deserve.

Revenue Models Provided to Investors

We are committed to paying every 25% of our stock exchange transaction commission income to our investors as U2, and every commission earned on our stock exchange is announced weekly, by doing so we promise to give the real value you deserve.

AIRDROP REVENUES OR LISTING INCOME

For each coin we will list on our exchange, we have considered giving airdrops to our gold and platinum members calculating logarithmically as much as the number of U2 tokens they hold, so that U2 token holders will have the privilege of having many different tokens free of charge, as well as their other income, without any extra effort. If there are projects which do not want to be listed by airdrop, then we will subject them to a listing fee and 25% of this listing fee will be paid to you, our valuable investors, like U2.

ICO PRIORITY SALES INCOME

ICO sales have great importance in blockchain technology. As we said before, we will search and score all ICO projects for you and list them for your vote, but we will provide priority participation to ICO for all Silver Gold and Platinum members so that when the listing is completed, you can easily earn income from ICOs purchased at cheap prices.

As we said at the beginning, all these income models are thought and implemented so that we can become a bigger family with you and earn together for many years. Remember that, how can we express that we care about you differently? Let's look forward to your agenda on this subject.

Nowadays, many exchanges make many decisions that often abuse their investors after growing their ecosystem. This is a very wrong approach, and it deals big blow to the stock market mission of the future. That's why we attach great importance to putting investors' decisions at the center of our own decisions while designing our stock exchange. To this end, we develop easy interfaces for creating surveys, creating agendas and voting platform all of which demonstrate the value we give to our investors.

10. Surveys, Creating Agenda, an Voting Platform Detail

CREATION SURVEY DETAILS

CREATING AN AGENDA DETAILS

VOTING PLATFORM DETAILS

Surveys, Creating Agenda, an Voting Platform Detail

CREATION SURVEY DETAILS

As it is known, the right to create a survey is a privilege that only Platinum members can do. With this privilege, our platinum members can start and vote on any topic they want and think important, but it should be noted that a platinum member holding a very high U2 vote has only 1 vote. This will ensure fairer voting as well as making very healthy decisions. After the surveys are created, our investors can vote during the voting period determined by the system. Taken decisions directly come to our team so that the main agenda topics of our team will be easily determined and the opinion of the community on that issue will attract the attention of the team. Later, the team will make the necessary announcements through the official channels on the subject. We look forward to getting your new surveys.

Surveys, Creating Agenda, an Voting Platform Detail

CREATING AN AGENDA DETAILS

As you know, creating an agenda is another way to get the attention of the team. The right to create an agenda is right only for our platinum members. This is a platform that enables the team to make faster decisions, to draw attention to possible problems faster, and to vote on urgent issues that need to be resolved faster. Thus, we thought of the urgent priorities of the team as a way to make the team more practical and the community to be more functional by rapidly forming agendas and their voting. We are looking forward to your new agendas.

VOTING PLATFORM DETAILS

It is very important for us that the opened surveys and agendas are easily voted according to the date order. As we said before, our gold members can vote on the polls and agendas opened by our platinum members. Just like every platinum member has only 1 vote, no matter how many U2 tokens own, our gold members also have 1 vote. The votes cast cannot be withdrawn and changed, so we recommend that you do not rush to make decisions.

Make this your own stock market however you want. After all, we did it for you, why not specialize?

11. Our Personalizable Exchange Module

We enable you to personalize your stock exchange in order to provide you better stock exchange experience. We know that many exchanges include a lot of unnecessary details other than the content that users use, so users have some difficulties in using the stock market.

That's why we allow you to customize your stock market. In this way, you will not have to see what you do not want to use while you move the content you want to use to your home screen. If you want, you can upload the pictures you want as the background of the stock exchange and make it unique to you.

12.Trade Competitions, ICO Workflow and Award Programs

Today, many exchanges are expanding their usage opportunities in the stock market with such events. We have decided to use these programs in our exchange in order to use our U2 tokens more actively and to grow the market of our exchange more, but we have not forgotten the U2 owners, we have given them various privileges, as mentioned before.

Trade Competitions, ICO Workflow and Award Programs

All these measures are to provide you with a better platform. Please do not forget to create a survey or agenda if you have any suggestions on this matter.

ICO WORKFLOW

Our trade competitions will mostly be held for coins that have recently entered our stock exchange and coins that make ICO. But, of course, we are open to suggestions from the community, and if you have different opinions on this matter, you can take advantage of our U2 trade and reward tokens that we have reserved for you. Remember that we will reward our investors who come to us with the most innovative ideas.

Trade Competitions, ICO Workflow and Award Programs

All these measures are to provide you with a better platform. Please do not forget to create a survey or agenda if you have any suggestions on this matter.

TRADE COMPETITIONS

As we have said, we will search all ICOs that request to be listed with us beforehand and then submit them to your vote, but the same is not true for all ICOs here, we may not have time to wait for voting to list some ICOs that we consider very valuable worldwide. We hope that you will understand us in this regard, that our fast listing by our team is important according to our protocols in order to ensure that our investors reach the best. This is the case for some lists. No voting will be made by the community to list the partners of our Exchange. Besides, since the listings of popular coins are also important in terms of the trading capacity of our exchange, the listings of these coins will not be submitted for voting. All remaining applications will be voted without exception, and applications that do not pass the voting will be able to revise their application content and participate in the voting maximum 3 times. An application that loses the vote each time, can no longer be voted on or remain on the agenda.

Trade Competitions, ICO Workflow and Award Programs

*Thank you in advance for
your contribution.*

AWARD PROGRAMS

Our award programs are diverse and detailed, but here any poster, logo, tweet, or video content that contributes to the advertisement of our exchange will be rewarded. We will invite everyone who adopts our ecosystem to produce content in these periods with the announcements announced in certain periods. We will reward our most admired participants with our U2 reward tokens, which are in our budget, so we hope to have a much better vision with the best content.

13. YouDex Team

While we were setting up our team, we paid great attention to its confidentiality. Because we observed that the teams and team leaders do not refrain from manipulating their coins. Moreover, they do not hesitate to use social media channels while doing this. Frankly, we decided not to reveal our team. It is because we can have complied with the privacy policy of blockchain technology, as well as preventing possible manipulation of team members.

You can understand our existence through our evidence of work at Github and our constant activity. We will continue to exist for you.
